

Appln. No. 10/050,126
Amd. Dated 11/20/2003
Reply to Office Action of 10/21/2003

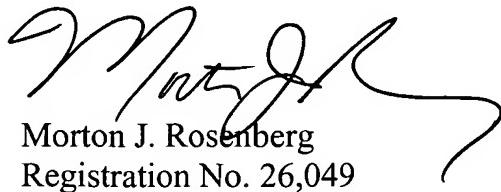

Remarks

This case has been reviewed and analyzed in view of the Official Action dated 21 October 2003. In the Official Action, the Examiner has found two inventions, namely, Group I directed to Claims 1-3 drawn to a wound disinfecting method and Group II directed to Claims 4-13 drawn to a disinfecting device. The Examiner has required restriction between the Groups. By this Response and Amendment, Claims 1-3 are elected by the Applicant for further prosecution in this case. Responsively, Claims 4-13 have been canceled from this application.

Claims 1-3 have been formally amended to denote the elements in usual U.S. Patent and Trademark Office Rules and Regulations format and to avoid any confusion of the numbering system.

It is now believed that the subject patent application has been placed in condition for examination and such action is respectfully requested.

Respectfully submitted,
FOR: ROSENBERG, KLEIN & LEE
